Exodus: Chapter 19 19:1 In the third month, when the children of Israel were gone forth out of the land of Egypt, the same day came they into the wilderness of Sinai.

19:2 For they were departed from Rephidim, and were come to the desert of Sinai, and had pitched in the wilderness; and there Israel camped before the mount.

19.3 And Moses went up unto God, and the LORD called unto him out of the mountain, saying, Thus shalt thou say to the house of Jacob, and tell the children of Israel; 19:4 Ye have seen what I did unto the Egyptians, and how I bare you on eagles' wings, and brought you unto myself.
To mail a document (you must be at the document level) type m and the following screen will appear. Type in your e-mail address.

Exodus: Chapter 19 19:1 In the third month, when the children of Israel were gone forth out of the land of Egypt, the same day came they into the wilderness of Sinai.

19:2 For they were departed from Rephidim, and were come to the desert of Sinai, and have seen what I did unto the Egyptians, and how I bare you on eagles' wings, and brought you unto myself.

Message Contents

-----------------------------

You have been added to list net-happenings@is.internic.net. The system has recorded your address as spepalis@tislink.tis.anl.gov and in order for your messages to get posted, you will have to send them from this address.

If a message is ever rejected, please contact the list's owner:

sackman@plains.nodak.edu

All requests should be addressed to listserv@is.internic.net.

The net-happenings list is a service of InterNIC Information Services. The purpose of the list is to distribute to the community announcements of interest to network staffers and end users. This includes conference announcements, call for papers, publications, newsletters, network tools updates, and network resources. Net-happenings is a moderated, announcements-only mailing list which gathers announcements from many Internet sources and concentrates them onto one list. Traffic is around 10-15 messages per day, and is archived daily.

Searching..
WHAT IS JUGHEAD

- Jughead is an acronym for: Jonzy's Universal Gopher Hierarchy Excavation And Display

- WHY SEARCH JUGHEAD: If you are searching a topic that should be found on many gophers (e.g., commerce business daily), you can find individual gophers to look at and avoid the repeated duplication of files that can make the search very tedious.

- Searches may use AND, OR, NOT connectors (a space between search-words = AND)
- Multiple ANDs, ORs and NOTs are evaluated left to right
- Upper and lower case are ignored
- Words may be truncated with an '* as the last character of the root-word

- Examples:
  
  SUPREME COURT          = both supreme and court
  SUPREME AND COURT       = both supreme and court
  SUPREME OR FEDERAL      = either supreme or federal
  COURT*                  = any word beginning with 'court'
  SUPREME NOT CALIFORNIA  = all entries with 'supreme' but excluding any with 'california'

- WARNING: If you use the gopher at Washington & Lee University, there are two Jughead databases one (on the main Gopher menu) indexes all menus at the W&L Gopher, and the other (on the "Other Gopher Resources" menu) indexes all Gopher sites.

REAL-LIFE PROBLEM

The searches that follow arose out of a question that I was asked. President Clinton had just recently signed an executive order dealing with recycling and waste. The question was asked at the beginning of November and the patron did say "just recently."

One method I followed had to do with my knowledge of gophers. On the UCSC gopher I followed the path Community/Guide to Government/White House Information Service/Memoranda, Executive Orders, and Proclamations/Executive Orders/October. I found two items: one was a summary of the executive order which had the information Kathy Macal needed, and the other was a press release. The date for the Exec Order was October 20.

I wanted to see, however, if I could find the actual executive order.
PROBLEM: POOR SEARCH STRATEGY

***************

WHAT IS VERONICA

• Veronica is an acronym for "very easy rodent-oriented net-wide index to computerized archives.

• WHY SEARCH VERONICA: It gives you the best chance of finding items relating to your question. It can be more tedious than Jughead but will find many items that might be impossible to find in Jughead. Higher level menus (Jughead) are not always specific enough to indicate the menu/documents found in lower menus.

• You can use 'and', 'or', 'not' boolean logic (see WHAT IS JUGHEAD). The search is not case sensitive.

• Not all Veronica sites (you pick the site to search from the Veronica and Jughead Server menu) have the same database. There will be slight differences between them.

• Veronica only searches the file name in the menu. It does not search the contents of the files.

• There is an ability to flag the search so that you can limit the resulting list by file type. This, and other more detailed information, is contained in a Veronica FAQ file I have. If you would like it, please e-mail a request for it.
PROBLEM: SERVER ERRORS

1. Did a Veronica search on COMMERCE BUSINESS DAILY. Received 5 pages (approximately 85 items). Chose an item 'commerce-business-daily'. Received the following message:

Server error: '/infosource/about-information-services/netres-archive/jan93/commerce-business-daily' does not exist!

Press <RETURN> to continue, <m> to mail, <D> to download:

2. From Infoslug, following the path The World/Other Internet Systems and Databases, we then choose '3. Campus-wide Information systems'. We get the following message:

Internet Gopher Information Client 2.0 p16

Campus-wide Information Systems

1. Server error: - Cannot access that directory.
