Preface

The author has been frequently requested by many of his former pupils to publish a series of club exercises, so graded as to cover a four years school course to be used in connection with other work in the gymnasium. The collection is the result of many years of experience in high school, college and normal school classes.

For exhibition purposes the leading feature is to arrange in review such exercises as will display the aptness of class work. The material presented can be selected and adjusted to fit the ability of any class.

The appendix furnishes drills which are models for exhibitions which have been carried out with great success by his colleagues, and are an invaluable addition to this manual.
Introductory Remarks

Pertaining to Clubs, Circles, Directions, Positions and Musical Accompaniment.

---

CLUBS.

For general use a 1 lb club is sufficient, especially for girls and ladies classes; for strong boys and men a 1½ lb club is ample.

CIRCLES.

A distinction is made between arm and hand circles. The arm circles may be a small arm circle with the center at the elbow, or a large arm circle with the center at the shoulder. In the execution of hand circles the arm generally remains in a fixed position; the handle or knob to be twirled between the thumb and fingers. When an exercise calls for a double arm or double hand circle in any direction it means that both arms execute the movement simultaneously.

DIRECTIONS.

The arm and hand circles executed in the vertical plane in front or behind the body are distinguished by the following directions:
The circles in the vertical plane, but at right angles to the shoulders "cross swings" may be executed in two directions, viz.:

Fig. 5." Forward
" 6." Backward

They are executed on the left or right side of body, requiring a $\frac{1}{4}$ turn of the trunk.
The horizontal circles are performed either above or below the arm in a horizontal plane, in all directions.

**POSITIONS**

If tactics or a marching drill precedes the formation, the clubs may be held in any of the following positions:

- **A.** Both clubs on shoulders.
- **B.** One on shoulder, one at side.
- **C.** Clubs between arms, hands on small of back.
- **D.** Clubs on forearms, hands in front.
- **E.** Fundamental position, clubs at sides.
- **F.** Starting position, fore-arms raised.

*Note.*—Some of the lessons begin from the fundamental pos., Fig. E, but more generally from the starting pos. Fig. F.
MUSICAL ACCOMPANIMENT.

In the given arrangement of exercises the "poetry of motion" would be incomplete unless accompanied by a well chosen musical selection. For general purposes a well marked waltz in quick tempo will be sufficient, one measure being equal to one count of the exercise, and each part covering periods of 16 counts; but music written in 4-4 or 6-8 time can often be adapted to some of the lessons.
