

The Bicycle Double Nine Domino Playing Cards do not come with a little-white-book, or any other documentation. However, they function EXACTLY like a normal set of Double Nine Domino tiles, and can be used to play normal domino games.

Dominoes with no more than six pips on their face (other than the double blank) are direct representations of a six-sided die roll.

For single die roll simulations, use the Domino Cards:
0|1, 0|2, 0|3, 0|4, 0|5, and 0|6.

For double dice roll simulations, use the Domino Cards:
1|1, 1|2, 1|3, 1|4, 1|5, 1|6, 2|2, 2|3, 2|4, 2|5, 2|6,
3|3, 3|4, 3|5, 3|6, 4|4, 4|5, 4|6, 5|5, 5|6, and 6|6.

Many Domino divination systems use the Double Six domino set. That set consists of both the above sets of simulation dominoes, plus the domino 0|0.
