

## DIRECTIONS

Only 30 Zodiac cards used.

Have your subject shuffle the deck, and make three piles.

Draw the first card of the first deck, and place it face up, vertically. You'll be reading the short, top line of this card.

Draw the second card of the first deck, and place it face up, horizontally, across the first card. You'll be reading the long, top line of this card.

Draw the third card of the first deck, and place it face up, vertically, over the second card. You'll be reading the short, top line of this card.

Read these three sentences for a message about your subject's past. Each card has a yes or no wish answer, as well, which may tell you more about the Wonderful Zodiac Deck's message.

Repeat this pattern with the second deck for a message about the present.

Repeat this pattern with the third deck for a message about the future.

You can make a mini-reading of just three cards, by having your subject shuffle the cards and cut the deck, and then drawing just the top three cards.
